On 11 April 1955, the following radar sets were seen:

1. One Token-type and one Fishnet-type radar sets were seen at their previous locations at Zwoelfaxing airfield, south of the hangars. The Kniferest-type and Fishnet-type radar sets which were removed on 30 December 1954, were seen at their previous locations north-northeast of the former sets. None of the sets was in operation. No soldiers were seen near them.
2. The radar set of undetermined type located about 100 meters southeast of the Oggau railroad station had been removed. Truck  with driver wearing red-bordered black epaulets occupied by 1 officer and 5 EM, all of whom wore black-bordered red epaulets parked at the Seehof dairy near there. The truck was later seen proceeding in the direction of Eisenstadt.
3. Compared to October 1954, there was no change in the status of the radar station on Kogl (hill) east-northeast of St. Margarethen. The station still included one set each of types Token and Fishnet, 2 temporary quartering buildings with a signal truck between and a line extending from the Token-type set to the temporary buildings via the signal truck. An umbrella-shaped antenna on a mast, about 6 meters high, was seen for the first time about 100 meters east of the Token-type set. A signal truck was parked next to this antenna. The radar sets were not in operation and no personnel was seen there.
